Work experience

DREAM I.T ldn

2015 - 2016

IT Consultant

During the time I spent at DreamIT ldn, I met great people and I've had the honour to see the company grow from scratch up to when it has a full team of young people from designers to business directors. Wether it was for a hand in recruiting the right people for the right psotions or just for an opinion about design and behaviour of the ltd itself, I was there, learning about how quick it is (if you have the right motivation and leadership) to grow a successful and joyful business.

During my time there I also shaped my skills on everyday problem solving as DreamIT serves Happy ltd and its staff in every IT related issue encountered.

Accomplishments:
- Learning about windows network
- Team work skills
- Refining my knowledge of HTML, CSS, JavaScript

Core Competencies

- Civil Engineering
- Structural Optimization
- Mining Stress Analysis
- Product Design
- Mechanical Engineering
- Drilling Geology
- Exploration
- Finite Element Analysis

Technical Summary

Familiar Operative Systems

- Raspbian OS (both with pixel and lite)
- Ubuntu 14.04 and greater
- BackTrack / Kali Linux
- Windows xp and greater
- OSX 10.12 and greater

Familiar IDE's

- Visual Studio 2015
- Xcode
- Code::Blocks
- vim
- Python IDE
- Sublime Text-Atom

Education

University

Master of Science, Finite Element Analysis

University

Bachelor of Science, Mechanical Engineering

Mining School

Open Cast Mining and Quarrying – CESECO

Career Development

- NASTRAN/PATRAN
- ABAQUS
- CATIA V4
- RADIOSS, CFD – Fundamentals
- FE-Safe

Skills
